

THE MATRIX

Total Home System

*Saving our planet
for children we'll
never meet*

The Matrix is a one-of-a-kind world-class energy device that incorporates a Condensing Water Heater, Condensing Furnace, Condensing Boiler and Heat Recovery Ventilator, and which is already pre-wired for air conditioning.

All of these functions are contained in one powerful system that produces exceptional comfort, with fewer tons of GHGs (Greenhouse Gases) than any other comparable home heat system – **The Matrix** is so efficient that between two and six tons of GHGs will be saved annually. A two-ton savings is equal to planting 280, or two acres, of trees.

Winner of Natural Resources Canada's
new eKOCOMFORT Award

**"NY Thermal is receiving
the eKOCOMFORT Award in
recognition of their innovative,
energy-efficient, world-class,
all-in-one HVAC system."**

*Wajid Khan, Member of Parliament
on behalf of the Honorable Gary Lunn,
Minister of Natural Resources*
